NYSERDA, a public benefit corporation, offers objective information and analysis, innovative programs, technical expertise, and support to help New Yorkers increase energy efficiency, save money, use renewable energy, and reduce reliance on fossil fuels.

NYSERDA offers energy audits to help eligible farms and on-farm producers identify ways to save energy and money on utility bills. Reports include recommendations for energy efficiency measures.

**Eligibility**

Eligible farms include but are not limited to dairies, orchards, greenhouses, vegetables, vineyards, grain dryers, and poultry/egg. The farms must also be customers of New York State investor-owned utilities and contribute to the System Benefits Charge (SBC). Please check your farm’s current utility bills to see if your farm pays the SBC.

**Energy Audit Options**

You can request the level of energy audit that best fits your farm’s needs. NYSEERDA will assign a Flexible Technical Assistance Program Consultant to visit your farm and perform an energy audit at no cost to you.

Level	Audit Activities	Type of Report that the Farm Receives
<b>Level 1</b>	Walk-through energy audit	Summary letter with limited evaluation of feasible energy efficiency measures
<b>Level 2</b>	Detailed energy audit	Energy audit report with calculated evaluations of appropriate energy efficiency measures including simple payback; meets ANSI/ASABE S612 standards
<b>Level 3</b>	Energy audit focused on specific systems, energy efficiency measures, or renewable energy	System-specific energy analysis report

**Get Started**
